### COST HIM MORE THAN FIFTY

Mr. Travers Had Not Properly Estimated His Losses on That Little Fistic Encounter.

"I can't afford to lose \$50 on a prize fight," mourned Gelatine Travers an hour or so after the shock he received over the wires that fatal Friday afternoon. "But you have lost it, haven't you?" we asked, and he nodded disconsolately as he climbed aboard a homebound car. He must have felt a premonition as he mourned, for it is unlike Mr. Travers to regret his losses; and when he arrived home he broke the news to Mrs. Travers, along with the implied suggestion that a little economy for the next few weeks would not come in amiss. Mrs. Travers said nothing in her most sympathetic manner, and the evening's conversation covered topics wholly foreign to prize fights. At the breakfast table next morning Mr. Travers had no taste for anything the norning paper might have to say, and Mrs. Travers gained possession of it without the usual contest. Glancing through the paper rapidly Mrs. Travers tore out a square section from page 2, and another from page 11. Then at one of those unexpected moments every woman knows breakfast is replete with, said: "So you could lose \$50 on a prize fight. Well, well. Here is a sale I have been awaiting for a long time. And strange to say, here is another just across the street one is on suits and the other on gowns. And the strangest of all, we happen to have accounts at both those stores. Fifty dollars, you say, you lost? Was it an even fifty?" And so it was that the breakfast dishes nt the Travers' home went unwashed Saturday morning because Mrs. Travers was obliged to catch an early jitney downtown and commence operations.-Kansas City Star.

## Pipe Built Like a Cornet.

A tobacco pipe of unusual design has been invented by Warren Murray Baechtel of Hagerstown, Md. Every pipe smoker knows that the longer the stem of his pipe the cooler will be the smoke. Pipes with stems a few feet long have been in use in different countries for many years, but their awkward length precluded their use outside of the house. The inventor of the pipe circumvented the difficulty by tube of a cornet or signal horn. The colls are connected at their lower end to form a dripping chamber for receiving the saliva which accumulates in the stem. Each coil has an independent opening into the dripping chamber and a screw cap at the bottom gives access to it for the removal of the passing through the coils of the stem,
